

**ALASKA EARTH SCIENCES**  
**Geologist II**  
**Job Description**  
**June 2017**

AES is looking for Geologists with 5 to 10 years experience in the minerals and energy exploration industry. We offer a range of positions that will challenge and interest applicants. Career paths at AES can lead to positions as senior geologists, project managers, and other positions.

Major duties of a Geologist II include:

- Drill rig supervision, core & chip logging
- Supervising geotechnical logging and sampling of drill core
- Reporting to clients and AES management
- Developing reconnaissance soil, rock, stream sediments sampling programs
- Geologic mapping of rock units, structures, alteration, etc.
- Overseeing data collection and data analysis
- Training and supervising junior geologists and field technicians
- Participating in project planning and budgeting

Requirements:

- Bachelor's or Master's Degree in Geology or related field
- Enthusiasm and a pro-active attitude
- Excellent written and verbal communication skills
- Demonstrated ability to lead and work effectively with others in challenging situations and remote locations
- Experience in wilderness settings
- Proven ability to utilize GIS for project support and planning
- Pre-hire drug testing
